<b>LABOR CHARACTERISTICS</b>	<b>&lt; Percentage &gt;</b> of the generation sources operate under collective bargaining agreements and <b>&lt;Percentage&gt;</b> of the generation sources operate with employees hired as replacements during the course of a labor dispute.
<b>CONTACT</b>	For your electricity supply service: < Competitive Supplier, Phone Number > To report an outage: < Distribution Company, Phone Number > Contact the Department of Public Utilities: < Phone Number >

**The Department of Public Utilities requires that all competitive electricity suppliers and electric utilities provide this important information to their electricity customers concerning their electricity supply.**

<sup>1</sup> All electric utilities and suppliers are required by law, under the Renewable Portfolio Standard, to purchase certain amounts of renewable energy for all customers. The amounts listed in the “Additional Renewable Energy” table above are the amounts that your supplier is purchasing **in excess** of the amounts that they are required to purchase by law. Accordingly, if you purchased 100% renewable energy from a competitive supplier, you the totals in the above table may add up to less than 100%, due to the renewable energy that your supplier was otherwise required to purchase under state law. If you are interested in learning more about the Renewable Portfolio Standard, please visit the website of the Department of Energy Resources at <http://www.mass.gov/eea/energy-utilities-clean-tech/renewable-energy/rps-aps/>.
